

Environmental Policy Statement

COMMITMENT

At Egan Waste Services Limited (The Company), we enthusiastically support the protection of the environment and the role that the industry performs in conserving resources through our recycling and re-use facilities and preventing carbon emissions through awareness. We are committed to conducting our business in a manner that protects the environment, supports the ecological use of resources and provide the minimisation of waste, and prevention of pollution.

RESPONSIBILITIES

We recognise this commitment as essential to our long-term future and public responsibility, and will strive to develop new concepts in regards to recycling. As a minimum, we will comply with all applicable environmental laws, regulations and standards. We will strive to achieve levels of performance which exceeds basic compliance.

We will regularly monitor our environmental performance, objectives and targets and ensure that the support functions exist to effectively maintain and continually improve environmental standards.

COMMUNICATION

We will continue to promote individual commitment to safe and environmentally responsible behaviour through the training and education of our employees, our contractors, and our visitors. The company will continue to establish links with local environmental groups.

OBJECTIVES

In the manner of our business decisions, we will consider potentially harmful impacts on the environment generally and on soil, water, air and ecosystems, and ensure that prompt and appropriate action is taken to protect the environment and evaluate all operational activities for environmental risk and not commence any of these activities until adequate precautions are in place.

We will strive to minimise our carbon emissions through the efficient use of energy, the use of sustainable products where practicable and economically viable, the use of verifiable and approved third parties if necessary and promoting awareness to our staff, particularly in regard to our main activities that include transport and its use. We will continue to assess suppliers through questionnaire and verification.

By the end of 2017, Egan Waste Services will have implemented and issued a more coherent Health & Safety and Environmental system for its employees and business needs.

MONITORING AND REVIEW

We are committed to supporting all the above through effective leadership, accountability, communication, procedures, management systems and training, and ensuring employees, visitors and contractors are aware of this policy, its impact on them and on the reputation of our business. This policy will be reviewed regularly in accordance with legislation or recommendations from our employees or third parties.
